ABSTRACT

This book provides research topic guides, or pathfinders, for 100 topics popular with secondary school students or teachers. Each guide includes the following sections: background information on the topic; look under the following subjects in the library catalog; browse for books on the shelf using these call numbers; reference materials that may help (books and CD-ROMs); periodical indexes; suggested Internet sites; key words for periodical and online searches; video programs related to the topic; organizations to contact for additional information; suggestions for narrowing the topic; and related topics. Topics are arranged under five broad areas: fine arts, language arts, and foreign languages; math, science, and technology; social studies--history, economics, and political science; social issues; and biography. A research topic guide template is appended, and an index is included. (MES)
